

JOB OFFER: RISK MANAGEMENT ENGINEER

We are seeking a talented and highly motivated person, interested in the security world at 360 degrees, willing to bring her/his own skills within the team and to gain further knowledge and skills related to risk management, security and safety of infrastructures, assets and people.

ACTIVITIES: The Risk Management Engineer will be involved in:

- All the phases of the risk management, security and safety of infrastructures, assets and people.
- Development of SW tools for the management and assessment of risks associated to threat and hazard scenarios.
- Proposals preparation. Within the company's RD&I activities the Risk Management Engineer will take part in the preparation of technical proposals for public bodies and private clients.

PROFESSIONAL SKILLS

- Master degree in an engineering field (e.g. security engineering, security management, systems engineering)
- Required: knowledge of risk analysis methodologies;
- Required: knowledge of threat and hazard scenarios and risk analysis basis;
- Required: understanding and managing risk;
- Required: assessing the potential impact on the identified risk and supporting the development of risk mitigation measures;
- Required: threat/hazard modelling capabilities;
- Welcomed: 2 years of experience in security and risk management of infrastructures;
- Welcomed: some programming skills.
- Welcomed: knowledge of cost-benefit analysis methods.

ATTITUDE AND OTHER REQUIRED SKILLS

- Order, precision and punctuality.
- Ability to work in groups or independently, under pressure, on projects for customers of different product categories.
- Planning skills and abilities in respect of deliveries and in the management of one's own time.
- Good (excellent is even better) and proven knowledge of both written and spoken English.
- Knowledge of the Italian language (spoken/written) is welcomed/recommended, but not strictly required.

PLACE OF WORK

Stam's offices in Italy (Genoa and Rome)
