

INNOVATION CONSULTANT

STAM is looking for an **Innovation Consultant** to join its office in **Genoa**, within the Research & Innovation Services team.

MAIN ACTIVITIES

The candidate will be involved in a multidisciplinary team for the development and management of research and innovation projects and strategic consultancy on issues relating to technological innovation, starting from the preliminary phases of scouting and definition of scenarios up to validation of solutions and business models by involving customers and external stakeholders.

In particular, he/she will be involved in the development of strategic roadmaps for customers and representative use cases that include economic/financial needs and an Action Plan, enhancing financing opportunities at national and European level.

The resource will be part of international teams involved in collaborative research projects that will lead him/her to travel and make use of his/her skills in an international environment, enhancing the skills of colleagues and the STAM network, which consists of over 1000 research organizations and high-tech companies.

In particular, the main activities include:

- Managing innovation projects and consultancy in every aspect: from planning activities and timing, to drafting contracts and the necessary administrative documentation, to monitoring and supporting the different phases of the project, up to the correct completion of all activities planned and the achievement of objectives;
- Maintaining and taking care of the relationship with the client's work team, facilitating the regular and complete exchange of information during the implementation of consultancy;
- Identifying possible critical issues, working to resolve them as early as possible, in order to guarantee delivery of the results on time and according to the expected quality standards, promptly reporting the critical issues to the work team and the relevant Business Area Manager;
- Participating in events, initiatives, meetings that allow us to promote the activity carried out by STAM or its customers and to acquire new research and collaboration projects with companies, including participation in brokerage events in the context of national and European research and innovation.

REQUIREMENTS

- Degree in Management Engineering, Biomedical Engineering, Material Engineering, Material Science or Economics;
- Good skills in Microsoft Office package;
- Good written and spoken Italian and English level;
- Availability to Travel for short/medium period of time;
- Car Driving License valid in EU.

WHAT YOU GET

- Opportunity to work on innovation projects, being engaged on different activities and increasing skills on cutting-edge technological solutions and applications;
- Possibility to influence from the beginning by working in multidisciplinary teams;
- Constantly engage with the challenges of state-of-the-art and future technologies;
- Enhance your skills and build a career path of excellence.

WORKING LANGUAGES: Italian, English

WORKING LOCATION: Genoa (Italy)

TYPE OF CONTRACT: full time employment

WHY WORKING IN STAM:

STAM is a fast-growing multidisciplinary engineering company, with a team of young talents involved in international projects alongside corporates, SMEs and start-ups in various fields and industrial sectors. The company has been involved in over 1000 projects to date and has an ambitious development plan that requires the constant inclusion of brilliant and eager candidates / and to grow professionally within a dynamic and excellent company.

STAM is a reality that puts its talents at the centre and enhances their skills and ability to shape the growth of the company, promoting the contamination of disciplines, intrapreneurship, and meritocracy.

This is a very good opportunity to join STAM'S team and to actively contribute to the development of the Research & Innovation Services Area, becoming part of a company that offers great possibilities to learn and grow.

Talent development is a managerial principle at STAM, and we are committed to fostering the growth of our employees with full respect of gender balance.
